MILLS

De Buyer and the mills

A spicy story and a challenge taken up with relish

For two centuries, the passion for cookery, taste and Gastronomy, both local and from around the world, has driven de Buyer's manufacturing. Its savoir faire in the design and manufacturing of high-quality kitchen and patisserie utensils responds to the demands of professionals and enthusiasts for all that is good and home-made.

It has thus created its own world dedicated to the mastery of taste, so it is entirely natural that it should wish to complement its collections with mills for salt, pepper and other spices.

However, de Buyer is first and foremost a manufacturer that loves to design, innovate and use its savoir faire and experience to make its products. As a living heritage company, the business has retained its artisanal soul, its rigour and its love for work well done.

De Buyer has always wanted to offer its own collection of mills, bearing its signature.

De Buyer approached Marlux to create this collection. Both companies share the same values, an artisanal soul and a love for work well done. Marlux is a family business, founded in 1875 and is also a living heritage company that has become a major name in the history of French mill manufacturing. In 1972, it revolutionised the world of spices by inventing the nutmeg mill and, as true benchmarks, their mills featured on the finest tables because of the quality of their salt and pepper grinders, manufactured on its own machines.

The great spice adventure began in 2015 for de Buyer and the first mills began to leave the factory in 2016.

The company's mastery of materials enables de Buyer to create mills with new signature mechanisms in steel and ceramic.

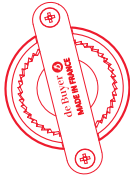

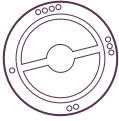

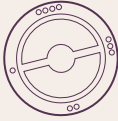

Today, the manufacturing process of the mills is part of the de Buyer company's CSR policy: the wooden mills are made of beech from sustainably managed forests and have obtained the Origine France Garantie certification.

Spices are ingredients that are inextricably linked to flavour; masterfully ground, they reveal themselves and enable us all to create our own symphonies of aromas.
