Proving

The Everlasting Magic Box for Bakery, Pastry and Pizza dough

New equipment can be a big investment, so it needs to add value to the kitchen or production area. These days energy efficiency is a high priority, but it is always worth considering how new refrigeration can improve kitchen processes, save time, how easy it is to keep clean and how long it will last. For example, using a Retarder Prover with an automatic end to end programme will help to eliminate the need for overnight working and help to control the quality of the dough.

Like all chefs and food producers, Bakers, Pastry and Pizza Chefs rely on their refrigeration to keep their products to exacting standards. The Everlasting GREEN Bakery & Pastry ranges have been specifically designed to control the retarding, proving and storage requirements for time and climate sensitive products, along with other fine ingredients.

Maintaining the optimal temperature, humidity and airflow is essential for ensuring quality and consistency. The Everlasting range of upright and counter Retarder Provers are perfect for bread, pastry, viennoiserie, doughnut and pizza dough.

The full range of Everlasting Bakery and Pastry refrigerated equipment can also be found at www.bakeryrefrigeration.co.uk

Ask Angel Refrigeration for Product Advice

We see ourselves as an extension of our customer's team. We know that the products we supply are essential to the success of the businesses we support. Our team is dedicated to giving professional product focused advice and service. We also offer a comprehensive installation, removal and disposal service, unfortunately some postcode restrictions apply.
