DATE:
Wednesday
July 29th, 2020

TIME:
14:00 – 14:45

As our sector moves out of the devastating disruption of the last few months one thing that is top of mind for many businesses is finance. Securing short-term funding to fuel the business through restart and into recovery is a significant challenge.

Join ABGi's Sandy Findlay (Partnerships Director) and John Lovell, Managing Director of Lovell Consulting to share their expertise in how to leverage valuable funding back into your business.

YOU'LL LEARN HOW TO:

- **Identify** a potential claim for R&D tax relief
- **Accelerate** your R&D claim - submit claims much earlier than planned. As well as bringing forward cash into your business, you will be ahead of any backlogs experienced at HMRC when things return to normal.
- **Secure** an R&D Cash advance - a cash loan against your current years R&D tax claim.
- **Use Capital Allowances** to secure potentially significant tax savings.

ABGi is a global consultancy specialising in helping companies capitalise on R&D and innovation activities through a range of Government-backed incentives such as R&D Tax relief, Patent Box and Video Games Tax Relief.

Lovell Consulting are Capital Allowances specialists - provide expert advice to many of the UK's leading accounting, tax and law firms.

This interactive webinar gives you the opportunity to **pitch your questions to the experts**. Please submit your questions to Jocelyn.carr@fea.org.uk, they will be answered by our key speakers during the course of the event.
